

FORA[®] Diamond

Blood Glucose Monitoring Systems

Innovative Technology to Fit Your Lifestyle

Test Simply. Live Better.

Diamond MINI

Mobile. Smart. Accurate.

Take Control of Your Day with
FORA® Mobile Health Solutions

 **Bluetooth®**

Monitor Your Health with iFORA.

Scan to get our unique iFORA App for free in the Apple® Store and Google Play.

Pre-meal (AC) and Post-meal (PC) Readings help you understand how your body reacts before and after meals. Holds **450 Tests in Memory**, records your test results and includes the time of each measurement.

With Bluetooth® 4.0, users can connect their blood glucose meter to their computer, **upload their test results and track changes** in blood glucose levels over time. Uses a USB cable to **quickly recharge**.

Diamond PRIMA

Sleek. Elegant. Reliable.

Cutting-edge Technology

Simply Designed to Fit Your Lifestyle.

Result in just 5 seconds
and no test strip coding
or calibration required.

**Uniquely designed
for your lifestyle.**

A unique design for
fashion lovers with
efficient lifestyle.

FORA® Diamond PRIMA features a smooth appearance, a **backlit screen** that offers considerable **contrast** and **brightness** for easier viewing, and **Universal Tone®** for visually impaired patients.

For usability, FORA® Diamond PRIMA provides a safer, more hygienic **strip ejection**, a **strip feed light** for the strip insert notice, and four alarms that remind you to run the blood glucose test on a regular basis.

With the **Micro USB** connection, users can connect their blood glucose meter to their computer, **upload their test results** and **track changes** in blood glucose levels over time.

Diamond VOICE

Audible. Accurate. Reliable.

Take Care of Yourself and Protect Your Independence.

The FORA® Diamond VOICE feature helps visually impaired diabetic patients by guiding them through each step of the testing process with a **clear, crisp, audible human voice**. It also allows patients to hear their test results.

Normal vision

Same display viewed by a patient with diabetic retinopathy

Many patients need help monitoring their blood glucose due to sight limitations.

With FORA® Diamond VOICE, Patients can Manage Their Blood Glucose Independently!

FORA® Diamond VOICE has a memory capacity that holds **450 tests** (with **7, 14, 21, 28, 60 and 90-day averages**) including date and time, and allows the user to choose **pre-meal or post-meal** measurements.

Diamond GD50

Simple. Accurate. Reliable.

Test Simply. Live Better.

Universal Tone® is specially designed to assist the visually impaired in measuring blood glucose. When Universal Tone® is turned on, the meter guides the user through the blood glucose test and outputs the results through a series of beep tones.

Accessory — FORA® My Dongle
FORA® My Dongle offers wireless data connectivity between the FORA® blood glucose meter and mobile devices, including mobile phones, Apple® iPads, and Android tablets.

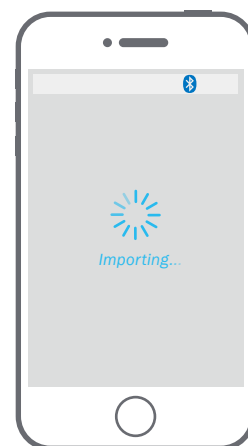

With the USB - RS232 Cable, users can connect their blood glucose meter to their computer, upload their test results and track changes in blood glucose levels over time.

How does FORA® My Dongle work?

Simply connect FORA® My Dongle with the FORA® Diamond GD50, and then open the iFORA App on your Bluetooth-enabled device. Your test results will automatically be synchronized with your device.

Top 3 Reasons You Need to Select the FORA® Diamond Series

FORA® TeleHealth Solution

Bridge the Gap Between Physician's Care and Diabetes Self Management

FORA® TeleHealth System offers patients better access to their health data and allows carers to remotely monitor the patients' health conditions via the internet. The software accurately collects data in a digital format and incorporates it into a digital record that can be securely transmitted. Patients, family, care providers and consultants can easily analyze health records remotely and respond efficiently.

Benefits of Universal Tone®

- ◆ **Universal Design** — a communication tool that breaks down language barriers by providing a universal language that can be used by all diabetic patients, including patients who are visually impaired.
- ◆ **Hope and Independence** — Universal Tone® gives patients a sense of independence and hope by reducing anxiety related to sight issues relative to blood glucose readings.
- ◆ **Full Care** — Universal Tone® supports all diabetic patients and is especially designed for visually impaired patients.
- ◆ **Reliability and Flexibility** — Universal Tone® provides a convenient solution with reliable results, measurement after measurement. Whether at home, at work or on the go, Universal Tone® provides the flexibility patients need with the accuracy they expect.
- ◆ Available on FORA® Diamond PRIMA, MINI and GD50.

Outstanding Accuracy

FORA® is dedicated in providing excellent clinical competence. This year, we are proud to inform you that we have obtained full ISO 15197 certificates ^[1].

What is so special about the full ISO 15197?

While previous ISO certifications fulfilled one clause requirement, FORA® went further and invested massive efforts to fulfill all the ISO requirements^[2].

FORA® delivers accurate, easy-to-use and top quality monitors for patients with diabetes to help manage their care. All monitors are clinically validated and meet the ISO 15197:2013 standards.

Product Name	± 15mg/dL <100mg/dL (<5.55mmol/L)	± 15% ≥ 100 mg/dL (≥5.55mmol/L)
Diamond MINI 	100%	96% ^[4]
Diamond PRIMA 	100%	97.7% ^[3]
Diamond VOICE 	100%	97.6% ^[5]
Diamond GD50 	100%	95.9% ^[6]
